

TRIDENT COLOR MIXING GUIDE

This guide is intended to help you mix the main and most popular colors on the artists pallet. Please note that there are notes and tips on some of the more 'extreme' formulations to make it practical and easier for you.

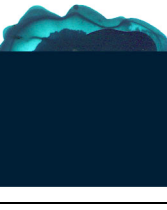

If there are any colors or formulations you would like to see, please let us know and we will see what we can do.

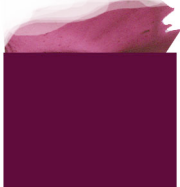

Swatch	Color	Drops	Percentage	Practical Mixing Tips/Notes
COOL primaries				
	Cool Blue	4 drops TRU Yellow 16 drops TRU Blue	20% Yellow 80% Blue	
	Cool Red	19 drops TRU Red 1 drop TRU Violet	95% Red 5% Violet	
	Cool Yellow	19 drops TRU Yellow 1 drop Cadmium Yellow (see mixture below)	95% Yellow 5% Cadmium Yellow 99.9% Yellow 0.01% Blue	
WARM primaries				
	Warm Blue	10 drops TRU Blue 10 drops TRU Violet	50% Blue 50% Violet	

	Warm Red	29 drops TRU Yellow 21 drops TRU Red	58% Yellow 42% Red	
	Warm Yellow		0.25% Red 99.75% Yellow	To mix colors like this or even lighter, it is suggested to mix a decent quantity of Benzimida Orange (Light Orange), then use a tiny drop or more of that in yellow to get your lightest oranges.
To make Transparent / Candy / Glaze				TRIDENT colors can be added to the Transparent Base to make Transparent colors. Transparent color show up over light surfaces and colors but are invisible over dark backgrounds
	Transparent Colors		Add 30% of TRIDENT color to 70% of TRIDENT Transparent Base (Neutral) Reduce as required	Most colors will give the highest transparency, however certain colors such as TRU White and TRU Flesh which have high concentrations of opaque pigment will only become translucent, not transparent such as yellow, red, blue, violet, green orange and so on.

Oranges				

	Benzimida Orange (Light Orange)	49 Drops TRU Yellow 1 Drop TRU Red	98% Yellow 2% Red	To mix colors like this or even lighter, it is suggested to mix a decent quantity of Cadmium Orange for your 'color library' then use a drop or more of that in yellow to get your lightest oranges.
	Cadmium Orange (Mid-Orange)	19 drops TRU Yellow 1 drop TRU Red	95% Yellow 5% Red	
	Pyrrole Orange (Moly/Burnt Orange)	18 drops TRU Yellow 2 drops TRU Red	90% Yellow 10 % Red	
	Naphthol Scarlet (Deep Orange-Red)	15 drops TRU Yellow 5 drops TRU Red	80% Yellow 20% Red	
Greens	Color	Drops	Percentage	Practical Mixing Tips/Notes
	Cadmium Lemon (light Lime)	999 drops Phthalo Green 1 drop TRU Blue	99.9% Yellow .01% Blue	To mix colors like this or even lighter, it is suggested to mix a decent quantity of Phthalo Green or Permanent Green Light for your 'color library' then use a tiny drop or more of that in TRU yellow to get your lightest greens.
	Phthalo Yellow Green (Slime Green)	99 drops TRU Yellow 1 drop TRU Blue	99% Yellow 1% Blue	

	Permanent Green Light (Grass Green)	50 drops TRU Yellow 1 drop TRU Blue	98% Yellow 2% Blue	
	Permanent Green (mid-Green)	19 drops TRU Yellow 1 drop TRU Blue	95% Yellow 5% Blue	
	Deep Green	18 drops TRU Yellow 2 drops TRU Blue	90% Yellow 10% Blue	
	Dark Green	16 drops TRU Yellow 4 drops TRU Blue	80% Yellow 20% Blue	
	Phthalo Terquoise	10 drops TRU Blue 10 drops TRU Yellow	50% Blue 50% Yellow	
Purples				The Trident range comes with a beautiful TRU Violet (which is a dioxazine Violet on the artists color palette). Though here are a few formulas for mixing rich variations.
	Dark Cobalt Blue	10 drops TRU Violet 10 drops TRU Blue	50% Violet 50% Blue	

	Thioindigo Violet (Violet- Red)	10 drops TRU Violet 10 drops TRU Red	50% Violet 50% Red	
	Quinacridone Violet (Red-Violet)	15 drops TRU Red 5 drops TRU Violet	75% Red 25% Violet
